DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 46-48 are rejected under 35 U.S.C. 102(e) as being anticipated by Yoon et al. '167. Yoon shows a method comprising the insertion an introducer into the body comprising a closed distal end (208), a tube or lumen (206), an axial opening (178), a side exit (210), a closed distal end (208), a proximal opening (178), at least one or a plurality of subsequently ejected marker elements (48), and a moveable shaft applying compressive force (188).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3764

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 49 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yoon alone. Yoon shows all the structural, functional, and method limitations of the invention as set forth in the previous paragraphs of this office action but does not explicitly state moving the device to a second position. It is obvious to one of ordinary skill to move the device in order to suit various needs and applications; it is implicitly inherent that the device must be moved when multiple marker elements are used because multiple markers cannot be used in the identical areas.
